

# ROHAN NAVNATH KURNE

## (FULL STACK DEVELOPER)

Satara, Maharashtra, India | +91 7058094949 | [rohankurnee@gmail.com](mailto:rohankurnee@gmail.com)

LinkedIn: <https://www.linkedin.com/in/rohankurne/> | GitHub: <https://github.com/rohankurne16>

### SUMMARY

Experienced Full Stack Developer with expertise in PHP, Java, Spring Boot, Laravel, React, MySQL, and REST APIs. Strong experience in developing scalable web applications, designing RESTful services, managing databases, and building responsive frontend and robust backend solutions. Skilled in Software Development Life Cycle (SDLC), API integration with modern web technologies.

### TECHNICAL SKILLS

- **Operating Systems:** Linux, Windows
- **Programming Languages:** C, C++, Java, JavaScript, SQL, PHP, Dart
- **Backend Technologies:** Core Java, Spring Security, Spring Boot, Laravel, JSP, Servlets, JDBC, Hibernate (JPA), Spring MVC, JWT, REST API Development, Microservices, Postman
- **Frontend Technologies:** HTML5, CSS3, JavaScript, React
- **Databases:** MongoDB, MySQL, PostgreSQL
- **Version Control Tools:** GitHub/Git
- **Android Development:** Flutter
- **Cloud:** AWS (EC2)
- **Concepts:** OOPs, Collections Framework, Multithreading, Exception Handling, MVC Architecture, SDLC, API Testing, JSON Handling

### WORK EXPERIENCE

#### Ultronyc | Full Stack Developer

(Feb 2025 - Present)

- Engineered and maintained 3 PHP/MySQL full-stack web applications serving 1000 concurrent users, integrating RESTful APIs that reduced third-party data retrieval latency by 20%.
- Designed and delivered 5+ JavaScript/PHP frontend-backend modules for client order-management workflows, cutting manual data entry time by an estimated 40%.
- Optimized database queries and backend processes, reducing average application response time by 25-30%.
- Deployed and managed applications on Ubuntu Linux servers while utilizing Git/GitHub and following SDLC best practices for development, testing, deployment, troubleshooting, and maintenance.

#### Do It Info System | Java Full Stack Developer Intern

(June 2024 - Jan 2025)

- Built 10+ RESTful API endpoints using Spring Boot and Hibernate (JPA) with MySQL/PostgreSQL for a logistics management platform, reducing backend processing time by 15% through query optimization.
- Implemented JWT-based authentication and authorization mechanisms to enhance application security.
- Performed API testing and validation using Postman, ensuring reliable and efficient backend functionality.
- Applied OOP principles, debugging techniques, and SDLC best practices to develop and maintain scalable applications.

### PROJECTS

#### Stock Management System

GitHub: <https://github.com/rohankurne16/Stock-Management-System.git>

PHP | MySQL | HTML5 | CSS3 | JavaScript | WhatsApp API

- Developed a Stock Management System using PHP, MySQL, HTML, CSS, and JavaScript to manage inventory, billing, and customer records efficiently.
- Implemented Stock In/Stock Out modules, customer credit (Udhar) management, and automated WhatsApp notifications for outstanding balances.
- Generated sales and inventory reports while maintaining a centralized database for real time stock tracking and business analytics.
- Optimized MySQL queries and implemented indexing on high-frequency inventory tables, reducing report generation time by 40% and improving overall application response time under concurrent user load.

#### Fleet Master Pro - Fleet Management System

GitHub: <https://github.com/rohankurne16/Fleet-Master-Pro-Fleet-Management-System.git>

Spring Boot | REST APIs | JPA | MySQL | Google Maps

- Developed role based fleet management modules for drivers, vehicles, and trip operations using Spring Boot and MySQL.
- Integrated Google Maps APIs for live vehicle tracking and route visualization.
- Built RESTful APIs and admin dashboards for trip allocation, monitoring, and reporting.

#### Smart Library Access and Attendance with Biometric Verification and Alerts

GitHub: <https://github.com/rohankurne16/Smart-Library.git>

Java | Android | Raspberry Pi Pico W | Fingerprint Authentication | REST APIs

- *Biometric library access system with Android + Raspberry Pi integration.*
- *Timetable-driven attendance validation reducing manual work by 92%.*
- *Generated and exported attendance reports in Excel format with automated digital record management and reporting.*

EDUCATION

| Qualification                                                        | Institute Name                                                       | Year of Passing | Percentage/CGPA |
|----------------------------------------------------------------------|----------------------------------------------------------------------|-----------------|-----------------|
| Bachelor of Technology: Electronics & Telecommunications Engineering | Dr. Babasaheb Ambedkar Technological University, Lonere, Maharashtra | 2026            | 7.18/10         |
| Higher Secondary Certificate                                         | Yashwantrao Chavan Institute of Science (Maharashtra State Board)    | 2022            | 61%             |
| Secondary School Certificate                                         | Sou Devibai Narayandas Chhabada Highschool (Maharashtra State Board) | 2020            | 84.40%          |

LEADERSHIP & COMMUNITY ENGAGEMENT

- Founded and organized 20+ cleanliness drives, coordinating volunteers and promoting community participation.
- Led trekking expeditions, managing route planning, team coordination, and safety activities.
- Demonstrated strong leadership, teamwork, communication, and time-management skills through outdoor and community initiatives.
- Proven ability to take initiative, motivate teams, solve problems, and achieve goals in dynamic environments.
